THE CHEMISTS OF NORTH CAROLINA

Dr. Herty, of the State University, Elected President at Annual Meeting.

THE GRAND LODGE OF MASONS

Twelve Hundred New Members 'Gained Since Last . Year.

(Special to The Times-Dispatch.)
RALERGH, N. C., January 6.—The
North Carolina section of the American
Chemical Society, in annual session here
to-day, elected Dr. C. H. Herly, of the
State University, president; Charles Walker, of the Agricultural and Mechanical
College, vice-president; Ca. M. McNider,
Raleigii, secretary-treasurer; A. S. Wheeler, State University, committeeman to
the national society; Charles Brewer, of
Wake Forest, and W. H. Pegram, of
Trinity, reporters. The session was devoted to the reading of technical papers
and was followed by serving of an claborate dinner by the local members.
When the North Carolina Grand Lodge
of Masons convenes in annual session here
next Tuesday night, the report of the
secretary will show the largest growth
in the history of the grand lodge. Sixteen thousand members, a gain of 1.200,
and 112,300 raised, \$2,000 more than any
previous year, and three hundred per
cent, more than ten years ago.
A. J. Harris will deliver the oration,
W. S. Liddell, of Charlotte, having served
the limit of two terms as grand master,
will probably be succeeded by LieutenantGovernor Francis D. Winston, now deputy grand master.

Interesting Cases at the January Term of Wake County Court.

(Special to The Times-Dispatch.)
RALEIGH, N. C., January 6.—According to a statement from the office of the state Auditor, the twenty-three saloons in Raleigh in 1903 paid to the State only 556.65 as two reaches and the state only state of the sta

in Raleigh in 1902 paid to the State only \$576.55 as two per cent, purchase tax, whereas for the year 1905 the Raleighi dispensary paid \$5.703.65 as two per cent of purchases. This difference is accounted for by the charge that the saloon-keepers did not give in all their purchases. The January term of the Wake county Superior Court convenes Monday, Judge Ward presiding. One of the most notable trials will be that of J. C. King, L. R. High, Jack Peele and W. F. Durham, four attendants at the State hospital for the insane here, on the charge of having caused by cruel treatment the death of the patient, Nall, whom they recaptured attempting to escape.

Then there is the case against ex-Policeman Isuae W. Rogers, charged with scret assault, with intent to kill, for the sensational shooting of Deputy United States Marshal John Dockery, whom he charged with the ruin of his daughter. It is probable that R. H. Lilliston and Clark, alias Morris, will be tried on the charge of shooting Charles Smith, of Petersburg, Va. on Friday of State Fair week, in the Union Depot here.

Mr. Stone, assistant land and industrial agent for the Southern, headquarters at Asheville, spent to-day here in conference with Governor Glenn and Secretary Bruner, of the State Department of Agriculture, relative to a concerted undertaking for the bringing of desirable immigrants into the State, his efforts being especially to locate them on the lines of the Southern.

YOUNG GIRL KILLED. The Wind Blew Down An Old Building On Her.

WINSTON-SALEM, N. C., January 6.—
Miss Bertie Bowles, aged 17 was killed
yesterday, six miles north of Germantown. She was in an old building, formerly used as a kitchen, when the wind
blew it down. Some of the timbers fell
on her, breaking, her neck and causing
instant death.

What Sulphur Does

The mention of sulphur will recall to many of us the early days when our mothers and grandmothers gave us our daily dose of sulphur and molasses every

mothers and grandmothers gave us our daily dose of sulphur and molasses every spring and fall.

It was the universal spring and fall "blood purifier," tonic and cure-all, and, mind you, this old-fashioned remedy was not without merit.

The idea was good, but the remedy was crude and unpalatable, and a large quantity had to be taken to get any effect.

Nowadays we get all the beneficial effects of sulphur in a palatable, concentrated form, so that a single grain is far more effective than a tablespoonful of the crude sulphur.

In recent years, research and experiment have proven that the best sulphur for medicinal use is that obtained from Calcium (Calcium Sulphide) and sold in drug stores under the name of Stuart's Calcium Wafers. They are small chocolate-coated pellets, and contain the active medicinal principle of sulphur in a highly concentrated, effective form.

Few people are aware of the value of this form of sulphur in restoring and maintaining bodily vigor and health; sulphur acts directly on the liver and excretory organs, and purifies and enriches the blood by the prompt climination of waste material.

Our grandmothers knew this when they dosed us with sulphur and molasses every

material.

Our grandmothers knew this when they dosed us with sulphur and molasses every spring and fall, but the crudity and injurity of ordinary flowers of sulphur were often worse than the disease, and cannot compare with the modern concentrated preparations of sulphur, of which Stuart's Calcium Wafers is undoubtedly the best and most widely used.

Clear Water Committee. The Times-Dispatch man left, After he had read his bid for the building of a filtration plant for the purification of the water served to the citizens of the city, Mr. Freeland Howe, Jr., representing the Pittsburg Filter Manufacturing Company, as chemist and bacteriologist, took his departure. This was about 9 o'clock.

At 11 o'clock the Clear Water Committee was still in session. Between these hours the members along with one or two other members of the Council who were not made members of the committee, heard petitions from some four or five concerns who wished to build filtration plants. From among this lot the committee will make a recommendation, and this recommendation will be that a filtering plant be erected by the city on a site on James River, in the vicinity of the present pump-house. There will be no settling basin. This is out of the question with the committee. Some place where the coagulating process can be demonstrated will be chosen and will be sent to the Council for adoption. And then will come the rub.

The proposition of adopting the scheme of getting clear and sparkling water from Chesterfield county, from Forest Hill Park and from various other sources that have since almost time immemorial been talked of and written about in Manchester, were given a hearing. The committee thought best of the filtration plant. And they at the same time thought it expedient to withhold from the public the nature of the bids and the maps that were presented by the various people that came. Mr. Freeland Howe was the only representative present, but there were plans from other concerns.
